

Environmental Policy

ERP Italia Servizi srl

European Recycling Platform (ERP) Italia Servizi is an environmental services company, general contractor through a contractual relationship with Consorzio ERP Italia, a compliance scheme for WEEE, Batteries, and Photovoltaic modules recycling. Moreover ERP Italia Servizi provides waste management services, environmental consultancy, circular economy project, to other Customers.

The ERP Italia Servizi major activity is the collection and management of WEEE (Waste Electrical and Electronic Equipment) and waste of batteries at the end of life acting as intermediary of waste on behalf of Consorzio ERP Italia.

ERP Italia Servizi offer also services out of the contract with Consorzio ERP Italia to Professional customers for the waste management of their end of life products including consultancy services.

The context in which ERP Italia Servizi operates includes Legal and Institutional obligations on waste management, Market Competition with other waste players and social responsibility.

Within the scope of our Environmental Management System (EMS) we believe that a healthy environment is a requirement for sustainable economic growth and we recognize and respect that our partners and customers expect us to take positive steps towards managing and improving our impact on the environment.

We will promote innovations in recycling technologies and work with authorities to build systems that reward products specifically designed for recycling.

Ongoing environmental improvement is central to our core business activity. As part of our responsibility to the environment, we are committed to:

- Fulfil all environmental regulations, legislation and other subscribed requirements relevant to the environmental aspects management of our activities;
- Work with regulatory agencies and advisers as necessary in the implementation of this environmental policy to protect the environment;
- Measure our most significant environmental aspects, setting and reviewing realistic objectives and targets for performance continual improvement and prevention of all risk of pollution;
- Work with suppliers and customers, in line with the concept of life cycle perspective, to influence and improve environmental performance;
- Promote environmental awareness of all the involved parties.

We will ensure that our stakeholders are aware of this policy by proper communication and of the opportunities that they have to contribute to improve our performance, therefore we welcome comments from our partners and customers on how they think we are doing and ideas on how we might improve. The Leadership for the implementation of the present Policy is of ERP Italia Servizi management that will take care of reviewing it periodically to ensure effectiveness and suitability to the contest.
